To whom it may concern

Dear Sirs,

Reference to DCT Civil Engineering Ltd ; A580 East Lancs Road Junction Improvement

Liverpool City Council (LCC) appointed DCT for the above project in January 2004. This contract was undertaken using ICE 5th Edition Conditions of Contract, in which LCC were the Client and 2020 Liverpool, The Engineer. 2020 Liverpool is an innovative joint venture partnership between LCC and Mouchel. It is currently fours years into a ten year contract to deliver Property and Professional services to the City of Liverpool and other clients, both in the public and private sector.

The £1.5m A580 Project, involved reconfiguration of a signalised junction on a major route into Liverpool including improvements to facilities for pedestrians and cyclists.
DCT managed a combination of their own in-house labour and a number of specialist subcontractors within a complex programme.
The works were delivered with efficiency and transparency, whereby DCT adopted an effective collaborative approach to problem solving together with a realistic approach to payment for additional/unforeseen works.
The quality of workmanship was high and rectification of defects was managed in a timely and cooperative manner.
Extensive traffic management including substantial overnight diversions were necessary throughout the life of the scheme and this too was managed effectively and professionally with local residents and businesses.
Throughout the project, DCT's management team were approachable, cooperative and always willing to assist wherever possible in their approach to carry out the works as efficiently and safely as possible.
Since completion of this project our relationship with DCT has continued to develop well and we are currently working together on a major contract to restore Stanley Park, Liverpool. This project involves the restoration of walls, pavilions, footpaths, open spaces and landscaped areas adjacent to the prestigious New Anfield Stadium.

Yours faithfully,
For 2020 Liverpool

Jason Williams
Divisional Director
